DATA  
WAREHOUSE  
MANAGER

# WHERE'S YOUR DATA?

As a manager entrusted with meeting the reporting and data analytics requirements of your business and its clients, you are under pressure to consolidate data from disparate sources. Ensuring that data extracted from various systems and formats can be pulled together in a standardized, usable format is a big challenge.

## **INCREASE EFFICIENCY AND SUCCESS RATE AT THE SAME TIME**

Accuracy and streamlined processes are vital for maintaining quality in your operation, and that is exactly some of the benefits Data Warehouse Manager offers you. With Data Warehouse Manager you can combine your SimCorp Dimension data with data from disparate sources, eliminating the need for costly ETL or data-consolidation tools. You will have direct

access to your data and the ability to extract valuable knowledge out of the Investment Management Warehouse. Combined with highly automated data-quality checks and validations, you are assured that your data warehouse solution is optimized for your reporting and analysis requirements. In addition, you will benefit from the tools and procedures you already know in SimCorp Dimension, which eliminates the need for additional user education.

# READY, SET, GROW

Data Warehouse Manager belongs to SimCorp’s portfolio of integrated front-to-back solutions for business process automation in investment management. Efficient workflows seamlessly integrate your organization and provide accurate and up-to-date information when you need it, empowering you and your business to mitigate risk, reduce cost, and enable growth.

SimCorp’s flexible and scalable solutions allow you to capitalize on opportunities as they arise and swiftly adapt to changes in business requirements. Leading investment management firms worldwide rely on SimCorp solutions to provide optimal business conditions and secure competitive advantage. Get ready to grow with SimCorp.

## SIMCORP DIMENSION - AN INTEGRATED SYSTEM

# DATA WAREHOUSE MANAGER

Data Warehouse Manager not only includes the data model but also the extraction definitions that populate the data model. The multi-dimensional data model is based on Ralph Kimball’s best-practice design principles for dimensional modeling with end-user simplicity in mind. You can be confident that the data is of a high quality, which makes your analysis and reporting more efficient and accurate. You can apply your data quality assurance efforts to data already in the data warehouse or to external data sources, drawing on SimCorp Dimension business logic and your own custom rules to ensure your reporting is based on clean and accurate data.

**Process flow in Data Warehouse Manager.** Data from anywhere in the front, middle, and back office is extracted into the SimCorp Dimension online transaction processing (OLTP) database. Along with market data and data from third-party applications, the OLTP data is included in the consolidation and quality-check workflows before the data goes into the data warehouse (SimCorp’s Investment Management Warehouse). The data is then ready for reporting and analytical queries.

# MEET YOUR REPORTING AND ANALYTICAL NEEDS WITH **DATA WAREHOUSE MANAGER**

- Implement the Investment Management Warehouse in weeks – not years
- Consolidate information from SimCorp Dimension with data from other systems
- Predefine ETL workflows developed and maintained by SimCorp
- Utilize built-in evolution, leveraging new subject areas with SimCorp Dimension upgrades
- Empower business users by reducing reliance on database administrators for reporting
- Draw on years of experience and industry best practices

## ABOUT SIMCORP

SimCorp provides integrated, best-in-class investment management solutions to the world's leading asset managers, fund managers, asset servicers, pension and insurance funds, wealth managers and sovereign wealth funds. Whether deployed on premise or as an ASP solution, its core system, SimCorp Dimension, supports the entire investment value chain and range of instruments, all based on a market-leading IBOR. SimCorp invests more than 20% of its annual revenue in R&D, helping clients develop their business and stay ahead of ever-changing industry demands. Listed on NASDAQ Copenhagen, SimCorp is a global company, regionally covering all of Europe, North America, and Asia Pacific.
